Advertisement from Smart Glas, dated Sep. 8, 1998.
STG - (B1) U.S. Patent (no pre-grant pub.) after Jan. 2, 2001
AB - A dual screen display system having, a base, a pair of electronic
display screens, an arm assembly supporting the display screens
and connected to the base, swingable mountings for swingably
mounting the display screens, the mountings being adjustable as to
the angular orientation of each of the display screens relative
to the arm assembly between a first arrangement with the screens
in a common plane, and a second arrangement in which the screens
are inwardly swung positions thereby to permit each of the screens
to be swung into desired operative angular orientation, and
adjustable movement limiting devices, engaging the swinging
mountings and limiting movement of the screens. Also disclosed are
interchangeable mounting brackets for mounting screens of varying
sizes, or for mounting screens in various configurations, and
hingeable and rotatable support members for supporting the screens
so the screens are swingable to face in opposite directions. A
modular display system is also disclosed which allows a one, two
three or four display panel system to be formed.
